HOW IT WILL WORK.

Canadian Farmers Will Profit by the Wilson Bill.

The Wilson Bill opens our market to the producers of Canada and gives them an equal share in all our trade. They pay no taxes in the United States, they live cheaper, pay lower wages and can usually sell for the same price or even less and make money.

Hitherto they, under the McKlaley Bill, have made up what they did not pay in taxes on farms and plants in the United States by a Protective Tariff at the border. We saw that our own farmers, our own workmen and our own manufacturers were given a fair show; that those who built up our towns, increased our ladustries, cleared our lands, built our schoolhouses and churches and maintained them—that these were not subjected to runnous competition: that what they expended in the material development of the country was held for them. We all have to do our due share toward helping to maintain law and order. Those who do these things should not be made to suffer for the benefit of this stranger, for him whose capital, plant, farm and industry are in a foreign country and who is

him whose capital, plant, farm and industry are in a foreign country and who is not and cannot he a factor of our own National wealth. The Canadian mannifacturer, farmer or mechanic had to pay at the border a tax equivalent, so far as could he computed, to the full cost of the privileges our market offered him. It is very much like a city which builds aldewalks, grades streets, puts in water works, fire systems, builds and maintains schools, erects churches and does all those things which make life pleasant and agreeable. Of course these things cost money, and to meet these oxprases taxes are laid on land, houses, mercantile establishment, etc.

HENBY NEWMAN & Co., New York, the most extensive importers of clothing and clothiers' supplies in this country, have assigned. Their liabilities are about \$1, 500,000, and assets about \$100,000 in excess. It is positively wonderful what a "revival of business" the country is enjoying under this delightful Democratic

Administration. SENATOR CULLOM, in The Forum, says "Let me classify approximately the pen-alties which have followed as the early result of the political tornado of November, 1892. Far below the very lowest in teiligent estimate made from statistic of value, I may charge the dominant party with having caused an absointe and tangible loss in dollars and cents to the Saturday night recipients of weekly wages, the working men and women of the United States, of \$500,000,000. I mean by this that by the depression in business consequent upon the advent to power of a political party which is not responsible to any higher authority hardly even to public sentiment-more than half a billion dollars in wages have been taken from the year's due of men, women and children who stood ready and anxious to give a good dollar's worth of labor for every dollar of wages. A thousand millions of dollars is but a small and modest estimate of the difference between the value of farms and farm pro dnets in March, 1893, and March, 1894. But the story is not yet half told. Cor porate enterprises, manufactories, rail-ways, tradesmen, professions—every interest is reached. These interests in which capital has been so largely inveswhich capital has been so largely inves-ted, including every factory, mili, store shop, railroad, mining company, vessei owner and transportation company, have onk, in valuation of investments and the loss upon business, much more than \$1,000,000,000 in addition. Add together, then, the recorded results of wrecked in iry and stagnant business which have met our eyes and ears; give ample allownee for every hope and ray of future unshine; and upon the most undoubted

WITH prime cattle worth less than \$10 per head in Anstraila and meat upon the free list, it is quite possible that we may become an importer of colonial meat. The average vaine of cattie on American farms January 1st was \$14 60, and even if the Canadian farmers are nnable to depreciate the value of our cattle their Australian cousins may be in a position to do so shortly.

In spite of the refusal of the Demo

cratic members of the Senate Finance Committee to hear the protest of the recent delegation of New England working girls against the Wilson Bill, says The New York Press, the memorial of these representative wage sarners has been laid efore Cougress. For this stroke of justice the public is indelted to the tact and fidelity of Senator Aldrich. It was a piece of political trickery to close the doors of Congress against the protests of these American young women. They these American young women. They belong to the ranks which do honor to the Nation. They are industrious and thrifty, and they mingle respect for themselves with respect for others. From their numbers will be recruited the future motherhood of the Republic. Their mission to the Federai capital was to appeal to the manhood and patriotism of American legislators against a policy that proposes to crowd down American women into social and industrial con ditions which would make the Americau home as we have heretofore known it impossible. It is significant that the Bourbon Tariff jobbers saw in this errand only a target for ridicule and abuse.
